

# Who am I?

Can you find the Sunwise animals? Match the animals below to the clue that tells how the animal protects itself from the sun's burning rays. Visit these animals to see if you are right and to stamp each box! And, when you get home, draw yourself being Sunwise in the circle.

Hippopotamus

Elephant

Tortoise

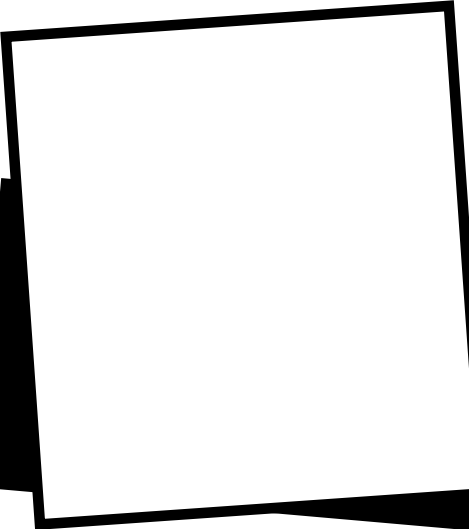

Koala

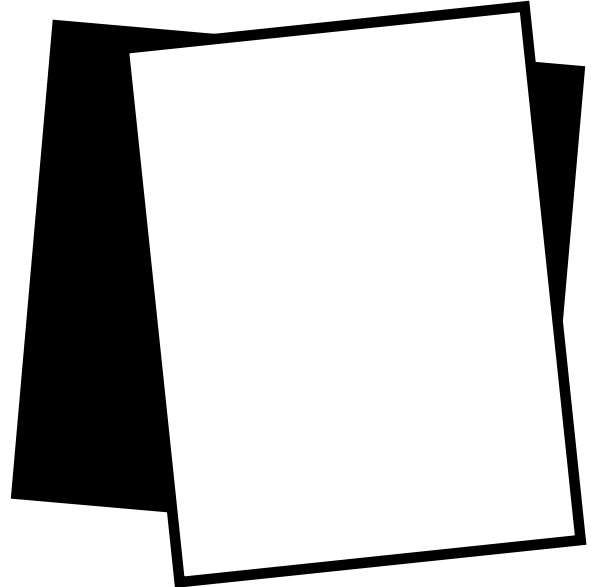

Meerkat

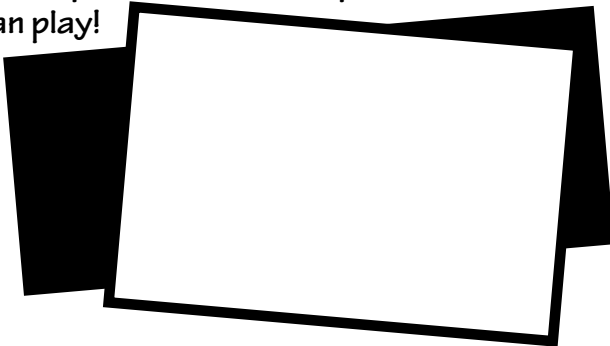

1. I put dirt and sand on my back to block out the sun, and drink trunks full of water, being thirsty's no fun!

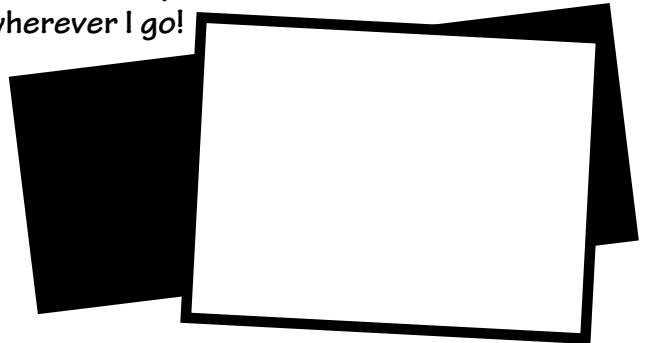

2. My black eye ring "sunglasses" protect my eyes from the sun's glare. I'm the coolest "kat" around with a social flare!

3. In water and mud I love to stay. My body makes an oily pink sunscreen to protect my skin so I can play!

4. I'm low on the ground and I move real slow. My clothing protects me from the sun wherever I go!

5. From morning 'til evening, I avoid the sun's rays. Eucalyptus trees shade me - keep me cool through the days!

Sometimes I wear a hat and stand under a tree. I also wear sunscreen -- this animal is me!
